

Barre City starts Park Mobile electronic pay for parking program

The City of Barre has two ways to pay for parking now – coins in the meter AND pay by the ParkMobile app. In an effort to improve convenience and personal safety Barre has partnered with ParkMobile to provide electronic payment for parking in the City.

The City has been set up in zones that allow for touchless payment using the App. The app will allow users to remotely add time to the meter up to the maximum allowable time for the meter. Visit the app store to download the free ParkMobile app. The app shows parking spaces and usage to help a user locate parking.

More than 95 % of all metered spaces in Barre City provide for Park Mobile usage. The City will continue to improve the parking available and use of ParkMobile in the coming months and years. Enjoy your visit and our thriving downtown businesses. In the maps above, the second shot shows the same area more close up.

All meters have a sticker inside that states the zone – so you can check the meter for zone to input your location. It's easy and convenient.

City Manager Steve Mackenzie notes that this is a step forward in our technology-based systems that will add real convenience for our residents and visitors. It also provides data on parking usage to augment the semi-annual parking survey program completed by our Planning and Zoning Department.
